HUNTER BLOOM

APPLIED SOFTWARE ENGINEERING
hebloom@icloud.com | Urbandale, IA
https://nailsbyhuntrr.etsy.com

PROFILE SUMMARY

Motivated Applied AI and software engineering student with hands-on experience developing and troubleshooting web applications using React, TypeScript, Python, Firebase, Google Cloud, and GitHub. Experienced in debugging data persistence, authentication, image uploads, cross-device synchronization, and mobile user-interface issues. A fast and adaptable learner who is eager to explore new technologies and gain experience with anything involving computers, from software development and AI to computer systems and hardware. Seeking an opportunity in software development or computer engineering where I can apply my technical skills, solve real-world problems, and continue growing as a developer. Also brings experience in data analysis, workflow automation, customer communication, and managing a small business.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, TypeScript
Web Development: React, responsive design, UI testing
Cloud & Data: Firebase, Firestore, Google Cloud, Google Drive integration
Development Tools: Git, GitHub, Google AI Studio
Troubleshooting: Debugging, root-cause analysis, error-log review, cross-device testing, data-persistence testing
Data & AI: pandas, seaborn, KNIME, Kaggle, n8n, data cleaning, visualization, workflow automation, AI-assisted development
Additional: REST APIs, OAuth authentication, Excel, Word

WORK EXPERIENCE

Ames National Laboratory / Applied AI and Data Science Program **Summer 2026**
Applied AI & Data Science Intern @ ISU

- Gained hands-on experience using applied AI and data science tools to solve real-world problems.
- Used Python, pandas, and seaborn to clean, organize, analyze, and visualize datasets.
- Built and tested KNIME workflows for data processing, analysis, and machine-learning practice.
- Used Kaggle datasets to practice data cleaning, exploration, and model-building concepts.
- Improved efficiency with AI tools by learning better prompting, checking AI outputs, and applying AI to practical tasks.
- Strengthened technical problem-solving, data organization, and communication through project-based learning.

Jimmy John's - Meredith Dr **March 2024 - Present**
PIC / Person in Charge

- Lead daily store operations, including opening and closing procedures, drive-thru, line work, food preparation, and cleaning tasks.
- Handle customer-service concerns and help maintain customer satisfaction in a fast-paced environment.
- Train, guide, and assist team members during daily operations.
- Maintain store cleanliness by cleaning utensils, containers, equipment, and work areas.
- Demonstrate leadership, flexibility, reliability, and the ability to work efficiently without constant direction.

NailsByHuntrr **2024 - Present**
Small Business Owner / Creative Product Designer

- Design, create, and sell custom press-on nails, keychains, and 3D-printed products through Etsy.
- Developed a custom web application to organize orders, product designs, photos, tasks, appointments, printing projects, and business information.
- Used React, TypeScript, Firebase, Google Cloud, Google Drive integration, and GitHub while developing and maintaining the application.
- Troubleshot data-saving failures, image-upload problems, duplicate records, authentication errors, mobile layout issues, and cross-device synchronization.
- Tested new features across desktop and mobile devices and used error messages and browser logs to identify and correct problems.
- Used AI-assisted programming, spreadsheets, and workflow-automation tools to improve business organization and daily operations.

EDUCATION

Des Moines Area Community College (DMACC) **2022-2026**
Degree: Associate Degree in Applied Science; completed Summer 2026
Relevant Coursework: Python, Data Science, Statistics, Precalculus, Programming, AI Tools
Johnston High School **2022-2026**
Diploma: High School Diploma, 2025

ADDITIONAL SKILLS

Leadership • Customer service • Communication • Teamwork • Problem-solving • Time management • Organization • Flexibility • Quick learning • Small business management • Creative
